

QUALITY POLICY

ALPHADIAGNOSTIC is a medical device manufacturer that specializes in in-vitro diagnostics.

Recognizing the financial risks and taking advantage of a favorable environment for national production. ALPHADIAGNOSTIC started building its own brand.

ALPHADIAGNOSTIC is dedicated to a quality approach in compliance with ISO 13485 standards, as part of its determination to provide high-quality products.

To achieve this, ALPHADIAGNOSTIC's quality policy is as follows:

- Comply with applicable legal and regulatory requirements.
- Listening to and satisfying interested parties.
- Ensure product conformity and safety.
- Extend the product line.
- Guarantee product accessibility.
- Promote the ALPHADIAGNOSTIC's Brand
- To improve the performance and efficiency of the Quality Management System, in order to ensure its maturity.

To this end, I undertake to make available all the resources necessary to achieve these objectives by investing each leadership with the authority required for the management and performance of the Quality Management System.
